### Air Classifier mill

### Applications

- Fine and specialty chemicals
- minerals, fillers
- resins, waxes
- Insecticides, pesticides, herbicides
- Food
- Feed
- Cosmetics
- Pharmaceuticals

### Features

- Shredding and sifting in one machine
- Particle size easily adjustable by speed of the classifier wheel
- Steep grain size distribution
- Low energy requirements, high throughput
- Grinding material feed via grinding air, good dispersion
- Separate drives for the shredding rotor and classifying wheel

### Performance

- Capacity 100 kg/h up to 9000 t/h
- Drive power for grinding rotor 11 kW up to 110 kW
- Drive power for classifier rotor 1,1 kW up to 18,5 kW
